Reflection: It has been said that religion is largely filled with people who are afraid of hell, and spirituality is for people who have gone through hell. As all initiation rites say in one way or another: you have to die before you die, and then you know. Jesus is always on the side of the crucified ones. Jesus is what mythology called a "shape-shifter." He changes sides in the twinkling of an eye to go wherever the pain is. He is not loyal to one religion, to this or that group, or to the worthy; Jesus is loyal to suffering!

Do you realize that takes away all of our usual group-think? Jesus is just as loyal to the suffering of Iraqi and Russian soldiers as he is to the suffering of American and British soldiers. He grabs all our boundaries away from us, and suddenly we are forced to see that we are a universal people. Most people do not like being that exposed and that shared. Yes, God is on the side of the pain, and goes wherever the pain is (which is abundantly clear in the Gospels). We can no longer pre-empt Jesus for our own group, religion, or country. People seeking power cannot use him for their private purposes. He belongs to the powerless. (Richard Rohr)

Deaths: *We pray for the recently deceased:* Gerry McPhillips, Leeds formerly Galliagh Terrace; Rosaleen McCutcheon, Arney. *May they rest in Peace*

Mary's Meals provides one good meal to some of the world's poorest children every school day. Our work is named after Mary, the mother of Jesus, who brought up her own child in poverty. In order to provide this much needed support, we have a number of fundraising initiatives throughout the year. These include street collections and bag packing in supermarkets. Anyone interested in volunteering with us for this important work, please leave your name and contact details with the Parish Office or contact Ann Curry via email: anncurry512@btinternet.com

PTAA Meeting Next meeting is on **Monday 11th April at 7.30pm** in Ros Erne House. All Welcome.

CARE OF CREATION CORNER:

Greenhouse gas (GHG) is gas accumulated in the atmosphere thus maintaining the heat received from the sun to the earth's surface. They allow sunlight to enter the atmosphere freely. They absorb part of the sun radiation, trap the heat in the atmosphere and reflect it back to the earth, so causing the warming of the planet. That's why they are called "greenhouse gases". Each of us must ask -how am I responsible for creating greenhouse gas? Do I contribute to global warming? What am I doing about it?
